A man wearing glasses is looking at a computer screen. The screen displays a line graph with several peaks and troughs. In the background, there are various numbers and percentages, such as 3.5, 50.1, and 43.9. The overall scene is dimly lit, with the light from the screen illuminating the man's face.

# WE UNDERSTAND AND MANAGE RISK

Forex trading is a lucrative opportunity to make money, but it comes with a lot of risk. Risk management is essential to minimize losses and protect your investment. How do we handle risk?

## MAX LOSS OUT

We have max drawdown rule of 30%. On a rare occasion that the 30% Draw Down is hit, the account will be moved to a recovery portfolio.

## POSITION SIZING

Position sizing is the process of determining the amount of capital to risk on each trade. Our Traders only risk a small percentage of the capital on each trade, usually no more than 2%.

## DIVERSIFICATION

Diversification is the process of spreading risk across multiple assets. Our Traders can diversify their Forex portfolio by trading multiple currency pairs.

# WHY CHOOSE US
